Work Experience

Software Developer **Bet 365 Group Ltd** **Apr 2019 – Aug 2022**

- Learned Go language in two months and converted part of the monolith ASP.NET member's project into Go microservices and in-house frontend framework including Login, Deposit and Payments.
- Created a tool which allowed member pages for each county to be switched between .NET and Go codebases. This tool was used to deploy over 30 pages in more than 50 different countries.
- Merged Sports mobile and desktop websites into a responsive website using TypeScript, SASS and an in-house framework. The website reached 60 million users worldwide.
- Mentored two graduated students by creating learning projects, suggesting reading materials, doing code reviews and evaluating their progress. Both of them moved to junior positions in one year.
- Set up CI/CD pipeline for automating the process of building, testing and deploying to a UAT environment for Go projects. This decreased the manual work for new projects and increased the code quality.
- Collaborate with project managers, designers and testers on launching different parts of the website.

Software Developer **Top Cashback UK** **Jun 2016 – Apr 2019**

- Built a new white-label website using ASP.NET MVC with C#, NoSQL and Angular.js and deployed it on AWS for one of the biggest UK banks.
- Developed Kanban project management software for implementing agile methodology using ASP.NET MVC, C# and jQuery. The software was adopted in a company with over 100 users.
- Maintained a tool for copying data from SQL database to NoSQL (Raven) database using C#. The tool provided synchronisation and consistency of the data between six different websites.
- Presented in front of 200 undergraduate students about my work at TopCashback which resulted in more than 20 job applications for different positions in the company.
- Implemented a feature for localization for the TopCashback website using ASP.NET Webforms, VB.NET and SQL. It was used for creating an Indian cashback website that reached 10 million users in the first year.
- Guide four students in their placement year by helping them with their work tasks and advising them on their final-year projects. All of them graduated with first honours degrees.

Software Developer Intern **DevriX** **Jun 2013 – Sep 2013**

- Developed a WordPress plugin for managing reservations using PHP, jQuery and SQL. Two restaurants later utilise this plugin as their booking system.
- Implemented open-source URL shortener extension using PHP that converted more than 1 million links.
- Converted HTML5 template into a WordPress theme for a company product portfolio website.

Education

Manchester, UK **The University of Salford** **Sep 2014 – Jun 2018**

- Bachelor of Science in Software Engineering with professional experience, First Class Honours

Technical Skills and Certifications

- Languages: TypeScript, JavaScript/HTML/CSS, Go, C#, VB.NET, PHP, SQL
- Frameworks and Libraries: React.js, Redux, ASP.NET, ASP.NET Core, Angular.js, Node.js, Express.js
- Tools: Git, Linux, AWS, Google Cloud, Jira, Trello, Jenkins, CI/CD
- Certifications: AWS Certified Developer Associate and AWS Certified Cloud Practitioner
